Each main part of the Jobsearch project involved one primary author incorporating input from all team members. Finalizing the working containers, databases, and routes took all hands, but the group was able to bring everything together. The rest of this document itemizes our contributions:

Matthew

- Routes
- Building the framework for the index.py and index.html files
- Creating the initial database using DataGrip
- Data for:
  - People
  - Education_Levels
  - People_Education

Rishabh

- Routes (Building index.py)
- HTML files (building the various html files)
- SQL queries (queries for routes and reports)
- SQL reports (put together the last three parts of the report)
- Data for:
  - Professions
  - Positions
  - Openings
  - Applications

Spencer

- ER Diagram
- Data Dictionary
- SQL file
- README
- Data for:
  - Industries
  - Companies
  - Companies_Industries
  - Offices
